

Sensor shelter - Yacht WITH NATURAL VENTILATION

PROFESSIONAL

ROBUST

METAL MATERIAL

NAVAL

LONGEVITY

Specially designed for yachts

For all weathers and for protection against radiation the sensor shelter with natural ventilation is designed for universal use with relative humidity and air temperature. Specially designed for yachts.

- Natural ventilation of the sensors
- No recirculation of the heated air into the ventilation circuit
- Light and radiation transmittance almost eliminated
- Protection against weather influences
- UV and weather resistant material
- Extremely robust with improved lamella system
- Mounting material for different poles included
- Easy installation on G1"-11 thread

APPLICATIONS

- Meteorology
- Specially designed for yachts

Professional Line	Sensor shelter - Yacht
Id-No.	00.08141.630000
Range of application	-50...+80 °C
Design	Mounting on G1
Dimensions	Ø 120 mm, Height: approx. 195 mm
Amount of lamellas	11 (2 lamellas closed, 8 lamellas normal, 1 lamella with Ø 73 mm opening)
Weight	approx. 581 g
Included in delivery	Screwing for sensor diameter 20 mm

As of: 23.04.2024
