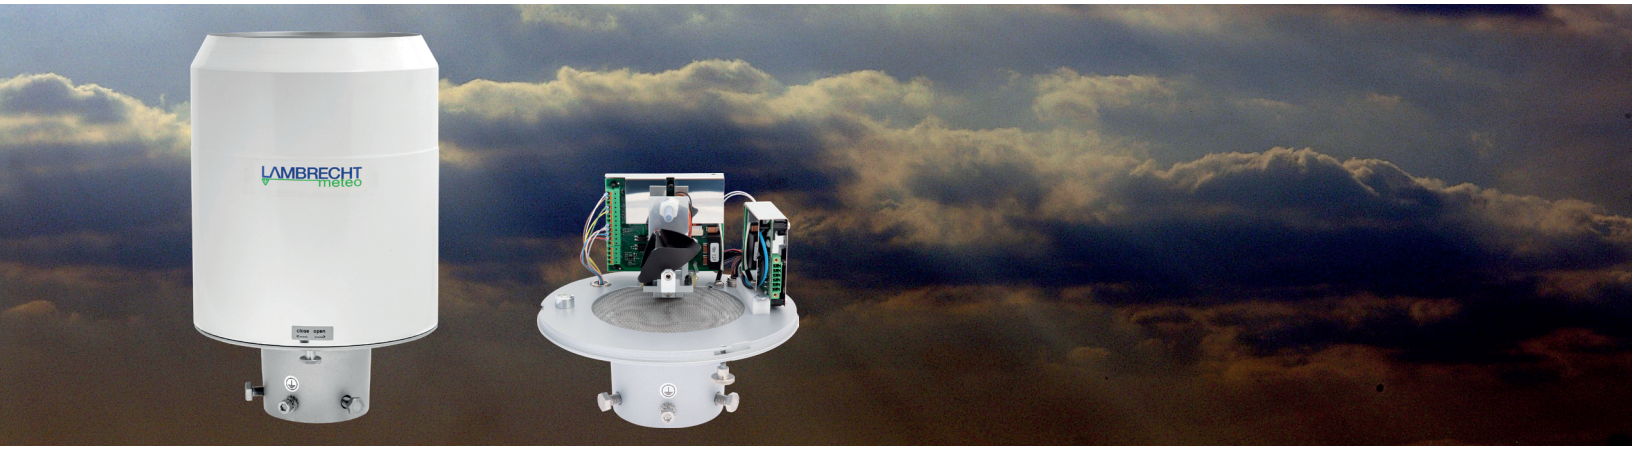
PRODUCT OVERVIEW

rain[e] Precipitation Sensors



High-resolution rainfall measurement in a compact design

OVERVIEW

rain[e]

Standard device with 200 cm^2 collection surface (WMO-compliant)

rain[e]LP

Low-power model with minimal energy consumption

rain[e]400

Larger collection surface of 400 cm^2 with compact design

rain[e]one Modbus

Cost-effective version with Modbus RTU interface

rain[e]H3

Meets the high requirements of the German Weather Service (DWD)

BENEFITS

- Industry-leading resolution and **accuracy of 0.001 mm/m^2** in a compact design
- Unique, continuously self-emptying collection system prevents overflow and incorrect measurements
- Environmentally friendly design provides full functionality all year without antifreeze
- Compatible with a wide range of data loggers for easy set up or expansion of your rainfall network
